## Editors' note:

Two years ago on April 25 we graduated our first class from the online high school.(at that point we did not call it Uriel University but Astron University high school.) At that time it was estimated that one in ten of our daily viewers was following the curriculum seriously and so we estimated between 50 and 150 graduates, all on the honor system as due to the delicate and at times dangerous nature of our mission, we did not require participants to register.

That summer as we began preparations for the fall trimester of 2018, we ran into some external conflict from several different quarters,which led to internal strife, which led us to further developments which in the end is a good thing if we look at it that way. The important thing going forward is that we all love each other. We are going to keep on with the mission now. QUESTIONS OF THE WEEK: Why could ecuador also be called volcania? why does a Bugatti have a horseshoe grill? How would you distinguish "company" from "corporation"? Where does the word Kubernetica originate and who was the first to write it down? What does that have to do with Bernie and norbert wiener and aaron swartz? (yes they are all jewish but it's more than that) What does the alphabet have to do with human and linguistic evolution? In what sense are the words foundation, fund and fondante related? And finally, which do you prefer, strawberry pie, cherry pie or elderberry?

which we never took last year for a variety of reasons we won't comment on here but the year before we did, and here are the pix: <http://monetinemondiali.neocities.org/springbreakpix2018>.

Vlad and the Vandals may be trolling about the perimeter but who needs vengeful vikings when you have valanga valentines? so don't worry.

As mars bars says (and why not enjoy a mars bar if you can find one) today I don't feel like doing anything...I'm just gonna say what I said. LOL.
